

Industrial Food

HACCP clothing concepts for the
food, pharmaceutical and cosmetics industry.

COLLECTION OVERVIEW

NEW COLOUR ADDED

Discover the additions to our women's range.

Our items for women have been specially tailored for the female body to meet the needs of the women who wear them. Cleverly designed cuts and functional details offer maximum comfort and optimum freedom of movement – all day long.

The HACCP risk classes.

Class 1: provision of a LOW level of safety and protection

Low hygiene risk: non-perishable foodstuffs or ingredients. The product is further processed or washed by the manufacturer or consumer. Clothing generally has to be changed once per week and, if dirty, may have to be changed more frequently.

Use in the pharmaceuticals, cosmetics or food industries, e.g. fruit, vegetables, fresh fish, flour (ground), herbs, spices, packaged frozen food, pasta, jars, tins.

21	11	51	53	0044	74	13
----	----	----	----	------	----	----

Class 2: provision of a HIGH level of safety and protection

High hygiene risk: unpacked perishable foodstuffs or ingredients. Particularly if food is not processed further and microorganisms could multiply in or on the food. Clothing generally has to be changed daily and, if dirty, may have to be changed more frequently.

Use in the pharmaceuticals, cosmetics or food industries, e.g. unpacked foodstuffs, cold meats, cheese, salads, cakes, soft drinks, alcoholic drinks, sweets, salting/smoking, fermenting, conserving.

21	11	51
----	----	----

Class 3: provision of a VERY HIGH level of safety and protection

Highest hygiene risk: unpacked, ready-to-eat, easily perishable foodstuffs (that will not be heated further). Clothing has to be changed daily and, if dirty, may have to be changed more frequently.

Use in the pharmaceuticals, cosmetics or food industries, e.g. fish, steak tartar, prepared salads, refrigerated ready meals, ice-cream, dairy products.

The BP® BASIC multipack.

Take advantage of a great multi-buy deal with our BP® BASIC multipack (15 items per pack).

More than a HACCP concept.

BP® has developed a clothing concept for people working in the food industry featuring maximum utility, comfort and expertise in achieving good fits for women and for him & her.

As a hygiene clothing solution that is **certified** for risk classes 1-3 in **compliance with the standard DIN 10524**, BP Industrial Food® is an elementary part of your individual HACCP concept. It meets the requirements specified in the standard for design, function and fabric. For reconditioning in the washing process, the collection was tested for its washing properties in accordance with ISO 15797.

Available in seven attractive colours, BP Industrial Food® enables you to implement your individual corporate colour scheme in the HACCP production process in accordance with the relevant standards.

HACCP stands for **Hazard Analysis Critical Control Point**. Since 2006, only food that meets HACCP guidelines may be traded in or imported into the European Union. HACCP examines and documents food processing. In this way, errors that lead to a hygiene risk can be identified and prevented. The resulting requirements of work clothing, its reconditioning and storage are regulated in DIN 10524.

**BP Industrial Food® – different colours,
same reliability.**

Retrofitting visibility:
HACCP in accordance with
EN 17353 Type B2.

EN 17353:2020
Type B2

The HACCP garments listed in the table below can be optionally fitted with **reflective strips** on the sleeves and trouser legs **in accordance with EN 17353 Type B2**, thereby improving visibility in the darkness, at twilight, in poor lighting conditions and when visibility is restricted.

BP® offers this standard-compliant reflective finish as an **additional service** – ideal for areas where improved visibility is required. Please enquire if you are interested.
