

BP[®] Protected

BP[®] Multi Protect Plus:
The energy your team needs.

COLLECTION OVERVIEW

BP® Multi Protect Plus. Energy thanks to more safety and comfort.

Safety can be this comfortable! The BP® Multi Protect Plus collection provides your team with the energy it needs to perform at its best each and every day. This personal protective equipment (PPE) uses particularly lightweight fabrics and is not only exceptionally comfortable but is also raising the bar in multi-standard protection. BP® Multi Protect Plus – a collection that unites comfort and safety. Because being well protected and comfortable means having the energy to carry out all the tasks the day may bring.

Energy for women.

In the new BP® Multi Protect Plus women's collection we have focused on the anatomy and the needs of our female wearers right down to the last detail.

The special fits for women not only ensure that women can work in safety and comfort but also mean that your entire team can be kitted out with BP® Multi Protect Plus.

Certified knee protection.

All of the trousers in the BP® Multi Protect Plus collection have certified knee protection.

Multi-standard protection for more safety.

BP® Multi Protect Plus provides inherent flame resistance as well as protection from the thermal hazards of an electric arc, making it the ideal protective clothing for **working with live voltage**.

The segmented reflective strips and the arm-lift system are just two of the many BP® Ergofit details that provide our wearers with maximum freedom of movement and perfect comfort.

Energy thanks to colours that fit your team.

Benefit from the choice we offer. From warning yellow/night blue to warning orange/anthracite or anthracite/black: our new colour combinations accentuate the collection's wear comfort, lightness and sporty, modern design.

BP® protective clothing – with T-shirts, fleece jackets and weatherproof jackets – is an extensive range of professional, lightweight, robust products that equips you and your team for every job and every type of weather.

Putting our energy into sustainability.

BP® stands for innovation and durability.

Clothing that protects wearers against chemicals must be regularly impregnated. Impregnating agents, however, are damaging to the environment when used in high doses. That's why, at BP®, we decided to give the collection items in the warning orange/anthracite colour combination permanent chemical protection (protection duration: at least 30 industrial laundering washes).

Our wearers can work comfortably and safely in any kind of situation. We have thought through and optimised each and every detail. The high quality of BP® products guarantees that they are particularly durable, which saves resources and protects the environment.

BP® Lightweight multi-standard high visibility jacket 2208-853-6556

- 2 materials,
- 5 types of fibre,
- 540 m yarn,
- 570 cm reflective strips,
- 54 pattern pieces and 1 BP® logo, our quality seal.

100% passion

Our energy: BP® quality.

The sheer joy of quality. An eye for detail. And it all fits like a glove. This is our passion at BP®.

We make clothing for people who identify with their work and who give their best every day.

With professional clothing, it is often the small details that make a big difference. For example, our hoods are designed to protect wearers from rain, snow and wind while never blocking their sight.

Our own quality laboratory in Cologne ensures a consistently strong focus on to all of the workwear details that matter to you in your daily work, helping to make your working day that little bit easier.

This is all the result of many years of development work, lots of one-to-one discussions with our customers, expertise, and a great deal of passion and creativity.

Sustainability through transparency.

FAIR WEAR

Our social responsibility.
The aim of the FAIR WEAR FOUNDATION is to improve working conditions for people working in the international clothing industry. BP® has now been named Fair Wear Leader nine times in succession.

Sustainable supply chain.
The Partnership for Sustainable Textiles, an initiative launched by the German Federal Ministry for Economic Cooperation and Development, aims to ensure social, ecological and economic standards along the entire production and supply chain in the clothing sector. BP® is actively involved in the Partnership for Sustainable Textiles.

Fairtrade cotton.
In 2019, together with a project group and Fairtrade, we set up the Supporting Fairtrade Cotton pilot project, enabling farmers to sell larger quantities of their cotton under Fairtrade conditions. In this way we are opening up access to fairer trading conditions, social change and greater environmental protection. More information at www.info.fairtrade.net/sourcing

Member of the Partnership for Sustainable Textiles

STANDARD 100
HEKATEX®

Tested for harmful substances.
Our responsibility also means that BP® products are harmless in terms of human ecology. That is why all BP® products are tested for harmful substances and most are certified in accordance with Oeko-Tex® Standard 100.

STeP
HEKATEX®

Sustainable management.
Some suppliers and producers are certified by STeP. STeP carries out comprehensive analyses to check whether companies and production facilities are being managed sustainably in relevant areas such as chemical and environmental management, health and safety, social responsibility and quality management.
